# Gematria + Water = GemWater

TAP WATER REGAINS ITS FULL NUTRITIONAL VALUE

You may know Gematria already as a globally active producer of extraordinarily effective laser-enhanced nutrition supplements. Prof. Dr. Todd Ovokaitys laid the foundations for the Gematria success story by inventing an innovative technical process in the early 1990s. This technology relies on energetic resonance principles, which can be applied equally successfully to improve the quality of tap water, thus reinstating its full potential as a highly valuable nutritional element. This effect has been further enhanced using proven energetic and physical methods of water activation.

This catalogue provides you with detailed information on different aspects of water activation. Please do not hesitate to contact us if you have any queries or comments.

With best regards  
Your GemWater Team

## Disclaimer: Please read this first!

Strict consumer protection regulations have been put in place to protect you, dear readers, from bogus products. For this reason detailed descriptions of the efficiency of the products and devices we offer can only be provided if their accuracy has been proven by at least eight independent scientific studies. However, these studies are rather expensive. At present, we have gathered a small number of investigations on GemWater products, which support us in our activities. We are, however, not allowed to refer to these at the moment, since we do not have eight independent studies yet. So we will continue “gathering” further studies in order to be able to present them to you as a package.

For this reason, we can only provide general information on what our products are capable of achieving in terms of water activation.

We fully trust the quality and efficacy of GemWater products, knowing that our products have already satisfied numerous customers. Moreover, the same principles of water activation we apply in our products today have been found to be very helpful for vitalisation of tap water by well-known water research-

ers such as the Austrian forest ranger and Naturalist Viktor Schauberg since the 19th century. An increasing number of contemporary scientists and water-experts are coming to agree with these views. Scientific research centres around the world have become increasingly interested in the unusual properties of water and are now providing new empirical and scientific data.

However, we have to bring to your attention the fact that the effects of our products have not yet been proven conclusively according to the criteria set forth by conventional science. This is the case for many alternative health methods.

The described properties of our products are based on experience gained from practical applications using GemWater activators. However, such experience is not yet validated by currently accepted scientific measurement methods. Consequently, our customers purchase products that are based on research outside the framework of conventional science.

# Water – A Carrier of Life Force

## SCIENCE DISCOVERS UNUSUAL PROPERTIES OF WATER

The quality of tap water in many countries is strictly regulated by governments to protect our health from the potentially negative effects of polluted tap water. Domestic water suppliers inform the public on a regular basis of their efforts to provide tap water of the highest quality. Modern filtering technologies and bio-chemical treatment methods are used in most water re-cycling systems. Thus, in industrial countries the tap water is usually chemically and biologically clean.

However, in recent years science has begun to support a much deeper understanding of the true nature and qualities of water that reach far beyond the chemical understating of H<sub>2</sub>O. It exhibits numerous unusual physical and biophysical properties, unlike any other substance in the world. One of the most important properties discovered in water is the ability to store information! An even more interesting observation is that given the right natural conditions water has demonstrated its potential for self purification.

The researcher Viktor Schaubberger has reported such observations more than 75 years ago. During his investigations he discovered the following:

*„In every drop of good natural spring water there is more power than an average modern power station can generate. This energy can be accessed effortlessly and nearly for free if we follow the paths nature constantly shows us, and leave behind the mistaken tracks of modern technology. Happiness and health, as well as unlimited amounts of energy, are accessible to us at almost no cost, once we realize that water, the blood of the Earth, contains the will and it's resistance, life itself, for which we fight so hard today, because through our actions, we continuously rob this carrier of all life of its most precious quality: its soul.“*

### The soul of water

So the goal, besides cleaning the water mechanically, chemically and biologically, is to revive its soul. We assume that the many substances that come into contact with water before it reaches our households leave an energetic pattern. This means that even if your water has been cleansed chemically and mechanically, it is likely still to contain the

information left behind, for example by pharmaceutical residues, which to date are not government regulated. It would seem obvious to think that a multitude of technical processes using water for cooling, cleansing or as a means of transport, also leave behind an information imprint on the household water supply. .

### Vitality from Nature's natural power

The ultimate culprit with regards to damaging the natural ability of water to self-purify, and taking away its vitality, is the nature of the transport system: the fact that water is transported under high pressure through many kilometres of long and mostly straight pipes. In nature, small streams and rivers meander through the landscape, which means that the water flows through bends, twists and forms whirlpools. In this instance the water will equally absorb a great deal of information: Vital energy from Nature's natural power.

If we give back to the water its natural ability to self-cleanse and supply it with information which is life-enhancing for human beings, animals and plants, our drinking water becomes once more a true carrier of life.

Gematria, in collaboration with Eckhard Weber, offers you sophisticated devices in the GemWater product range, which incorporate some of the principles suggested by Viktor Schaubberger and other water experts. We are convinced that in this way your drinking water returns to its natural state as a life giving medium.

The research that exists about water is vast, far too much to detail in this context; but if you would like to find out more you can google: Prof. Rustum Roy (Pennsylvania State University), Prof Konstantin Korotkov (St. Petersburg State University, Russia) or Prof. Vladimir Voeikov (Lomonossov Sate University, Russia).

## Nature, inventive talent and drive

### OUR MOTIVATION AND ENTHUSIASMS

The compounds of active ingredients developed by Dr. Todd Ovokaitys and the process of laser enhancement he has invented support life processes in every cell of our body. For human metabolism on a cellular level, water is the most important medium of transport and communication. The immediate surroundings of each cell influence the efficacy of its metabolism. From this perspective the quality of the liquid between the cells is of paramount importance since it is the main medium facilitating these processes.

The logical conclusion is: As soon as we supply our bodies with pure, natural water as a carrier of life-enhancing information and energies, our cellular metabolism functions more optimally. Our vitality increases noticeably, joy of life and inner balance enrich our lives naturally.

The GemWater products combine modern water activating technologies with the laser enhancing process developed by Prof. Dr. Todd Ovokaitys. We are confident that you will feel a real benefit in your daily life!

## Prof. Todd Ovokaitys MD

### MEDICAL RESEARCHER AND INVENTOR

Dr. Todd Ovokaitys started his academic career at the Northwestern University, finishing his studies as the best of 1,800 fellow students. He then began his medical training at Johns Hopkins University, which is regarded by experts in the medical field as the foremost medical department in the USA. He continued his studies here and at Georgetown University, always following his vision to find efficient and gentle remedies for diseases such as cancer and HIV. He also aimed to combine conventional and alternative medicine with new technologies. With this in mind he researched the impact of light on organic substances – It is from extensive studies in this area from which laser energised nutritional supplements produced by Gematria have resulted.

Today, customers around the world trust these unique products. The water activators produced by GemWater also contain substances which, after having been laser-energised, enhance the subtle energy properties of the water passing through or alongside them.

## Eckhard Weber

### SPECIALIST IN MEASUREMENT METHODS AND RESEARCHER OF BIO-ENERGY

The entrepreneur and researcher of bio-energy Eckhard Weber worked for 25 years as a surveyor for an energy supplier, and, during this period, became very familiar with conventional surveying. In 1982 he became interested in phenomena which are outside the boundaries of established sciences and measurement procedures, such as geomancy (research on earth energies), radiesthesia (research on earth radiation etc.) and bio-energy. With numerous subsequent experiments his interest grew even further. When a family member became seriously ill, he hoped to be able to support conventional medical therapy by means of bio-energy, which he regarded as very promising. The result encouraged him to set up his business. Since then, he has developed numerous appliances able to use bio-energy for the benefit of humans and animals. Among these are his water activators, which we have further enhanced using the laser-technology by Prof. Dr. Todd Ovokaitys.

## Viktor Schauburger

### WATER IS THE BLOOD OF THE EARTH

The Austrian Naturalist Viktor Schauburger lived from 1885 – 1958. Closeness to and love for nature was deeply rooted in his family tradition. Like many of his ancestors he worked as a forester and, among other things, was concerned with the challenges of the timber industry. He became famous for the development of log flumes, which resulted from his research into the properties of creek and river flow. He strived for technology modelled on nature.

From his observations, he concluded that we know little about the powers inherent in nature. He referred to water as the ‚blood of the Earth‘. He assumed that by means of a strong water vortex a type of energy is released, from which nature creates All.

# GemWater Products

FOR HOME OR BUSINESS

In our industrial societies we place great demands on our water supply often disregarding its significance to our health and wellbeing.

GemWater products support

- Self-purification of water
- Deleting of the information absorbed from harmful substances
- Enhancement with life-supporting energies and information

We have developed our products to make it simple for you to integrate them easily into your life, be it

- your home or
- your business.

GemWater products enhance your drinking water in the most effective way, so it resembles the character and quality of pure spring water, just as Viktor Schaubberger envisaged.

## Our Services

### DEMONSTRATIONS AND CONSULTATIONS

The purpose of GemWater is not only to improve the quality of your drinking water, a large part of our interest and motivation also lies in education and training. It is our mission to inform wide sections of the public about water and its activation, illustrating how important this technology is and what incredible potential it represents in terms of acknowledging a greater consciousness and understanding of water and how it relates to our health, life and environment!

Therefore we offer competent advice on questions regarding water activation as well as seminars and demonstrations, at which you can learn more about the principles used in our products. We would like to take this opportunity to pass on our enthusiasm for water to you. It is truly astonishing how your view of life itself changes, once water becomes the focus of your contemplation. From our own experience we would therefore like to say: When we study water, we learn a lot about life - including ourselves!

We would like to help you re-ignite the life force which is so intrinsic to water itself allowing its natural potential to flourish.

## Guarantee for Devices, Life Expectancy

### FOOD-SAFE AND MAINTENANCE FREE

When developing our products, we have paid attention to quality and performance as well as easy operation.

The natural and synthetic materials used by us comply with the highest quality standards and are food-safe.

All GemWater products are handmade by highly skilled artisans and are subjected to frequent quality controls.

We are convinced of the high quality of our water activators and this is reflected in our warranties. We give a 2 year manufacturer's guarantee on all water activators.

- Thanks to the enhancing principles used, our products have an unlimited life-expectancy.
- Since they do not contain any mobile parts and work without electricity they are completely maintenance free.

## The operating principles of GemWater activators

### LASER-ENHANCING, WHIRLING PROCESS, BIO-ENERGY

The laser-enhancing process developed by Dr. Todd Ovokaitys relies on laser-electromagnetic resonance technology. Scottish physicist, electrical and chemical engineer Scott Strachan worked in conjunction with Dr. Todd Ovokaitys to advance his original concept. This scientist is well-known among other things for the invention of the „real-time ultrasound device“ and the development of high precision laser measuring instruments. For his achievements he was awarded the „Enterprise Scotland Award“ by Prince Charles.

Once Dr. Todd Ovokaitys had researched the fundamental principles of how electromagnetic radiation affects living systems, Strachan was the right man to breathe life into the fundamentally new laser-electromagnetic acoustic resonance technology in the form of a functioning device. This technology has been patented under US patent 6064500 and world-wide patent WO9722022A1.

The operating principle: A highly focused laser beam of several spectral ranges and high coherency is used. Coherency refers to a high degree of order, which causes molecules encountering this light to restructure and assume a higher degree of organisation. We can assume that, in the same fashion, the laser-activated quartz sand powder placed in the heart of the activator will cause the water flowing through the activator or alongside it to adopt a higher degree of organisation. This may result in the water being able to better supply body cells, support detoxification processes and enhance the efficiency of enzymes in the body.

When these forces come into contact with living cells, the following processes may be improved:

- absorption of nutrients and information
- biosynthesis of body substances and tissues from nutrition
- release of energy in body cells

Laser-enhancing has a particularly strong positive effect on amino acids which are the building blocks for essential proteins, enzymes and other important components of cell metabolism.

Effects:

- Nutrients supplied to the body may be metabolised more effectively.
- The energetic fortification of the intercellular tissues by means of activated water may lead to noticeably improved tissue quality.
- Detoxification and purification processes may be enhanced.
- Intercellular communication in the body may be improved, which has a positive effect on the nervous system.
- The biological activity of water molecules with a high degree of structure can result in increased energy availability in the cells, which improves performance.

## The built-in activator

### ACTIVE WHIRLING PROCESS INSPIRED BY VIKTOR SCHAUBERGER

When observing water, Viktor Schauberger realised that in nature water meanders through the landscape and, by producing whirlpools and vortices in rivulets, purifies itself and absorbs oxygen. When examining vortex structure more closely he found that the self-purifying and enhancing effects in natural water courses owe their existence to the power of implosion (a centripetal, inward directed force). Thus GemWater Plus Activators also use the power of implosion in order to enhance the self-purifying properties of water through a powerful whirling process.

The function: The water is guided into a POM-plastic spiral at the same pressure as is found in the water pipes, where the water is powerfully whirled in three separate water courses. The construction of the spiral was modelled on an example from nature: the horn of the Kudu antelope. The special quality of this spiral: The water courses taper off at the exit, which accelerates the water molecules as they pass through. This results in an optimal vortex forming. At the exit of the spiral the three water courses meet and form a powerful spiral. This generates implosion forces, which produce a highly efficient self-purifying process. During this process large water clusters are broken down into much smaller ones, thus eliminating the information left behind by toxic substances and reducing the surface tension of the water. Embedded accumulations of minerals are also broken down substantially by the implosion forces, resulting in softer water. Another benefit of this process is the fact that the water absorbs oxygen in the vortex.

The vortex and the corresponding centripetal force, continue for several metres along the pipes after passing the built-in activator, and thus dissolve mineral and rust deposits in a gentle way. After only a few weeks of using GemWater activators, the mineral (lime scale) deposits in pipes, heating systems and kitchen appliances are visibly reduced, with new deposit formation being prevented even if the water is hard.

### MULTIPLE-LAYER BIO-ENERGY BEAMERS

In addition to the energised quartz sand a powerful orgone beamer is used in each GemWater activator, the harmonic measurements of which follow the rules of Sacred Geometry. This produces a strong shape radiation which has a structuring effect on living systems. (Every shape carries a specific frequency; harmonic shapes, as in nature, carry harmonic life supporting frequencies). With the help of this extraordinary force the beamers inside the GemWater activators recharge automatically and are simultaneously protected from potentially harmful external energies. All metals, as well as organic and non-organic materials used, further support the process of building up bio-energy (also referred to as orgone energy). These effects were first understood by psychiatrist and researcher Wilhelm Reich, who applied them to build his Orgone Accumulators. The gem stones and phials of healing water (present in some models, see below) also contribute to energetically charging the tap water.

The combination of these enhancing processes results in large water clusters being broken down into smaller ones and in the removal from the water of imprints by toxic substances, while new life-enhancing information and frequencies are added.

Since GemWater activators benefit from built-in protection, they can be permanently used in the vicinity of electric wires, telegraph masts or geo-active zones (e.g. through geographic faults or subterranean water veins).

## Glass phials with healing water and oxygen

Some Gem Water activators derive extra power from glass phials, which have been filled with healing waters (GemWater Travel and GemWater Impulse) and with pure oxygen (GemWater Boost).

The orgone beamer transfers the energy vibrations of the phials into the tap water. The self shielding effect of the beamer offers protection to the positive information of the healing waters and the oxygen. This mechanism ensures that even in negative environments created by power cables, telecom masts, technical appliances with strong electromagnetic fields and geo-active zones the activation process is still effective.

## Concentrated power

GemWater Water activators have been developed on the basis of the well tested water activators produced by the German company Weber Bio-Energy Systems and Environmental Technologies for many years. Many positive experiences of their effect on tap water and water pipes have been documented.

A selection:

- Improved taste of tap water.
- Softer water.
- Lime scale is dissolved and can be removed and flushed away more easily.
- Decreased amounts of washing powder required.
- Harmonising effect on human beings, animals and plants.
- Increases in thermal conductivity of water (lower heating costs!).
- Less odour.
- Improved water quality for bathing and swimming pools.
- Adds oxygen information to the water.
- The water circulating through the heating system remains clear (no corrosion).
- Surface tension of the water is reduced.
- Rust deposits are dissolved.
- Positive changes in the cluster structure of the water.
- No lime scale deposits in pipes and boiler systems.
- Lower cleaning and maintenance costs.
- Longer life-cycle for coffee makers, washing machines, heat exchangers and all household and industrial appliances that work or come into contact with water.

## GemWater Plus

GemWater Plus activators represent a quantum leap in the area of physical and energetic water activation. In addition to activation via the bio-energy beamer, these models also incorporate the principles recommended by Viktor Schauberger. A spiral developed specifically for this purpose and made of food-safe POM plastic is modelled on the natural shape of the horn of the Kudu antelope. As the water passes through the activator, this results in a whirling process powerful enough to create a strong vortex at the spiral's exit, of the same quality as occurs naturally in rivulets and river courses. The implosion, which occurs at the centre of the vortex, results in the water purifying itself.

The GemWater Plus model is made of stainless steel and is suitable for household or business premises.

Before flowing into the activator, the water has already been energetically charged by a turbo loader. While subsequently flowing through the spiral and the pipe, it is exposed to the force field of the bio-beamer. This activates the water even if it has been sitting in the pipes.

GemWater Plus water activators are also filled with quartz sand, which has been subjected to the laser-enhancing process developed by Dr. Todd Ovokaitys.

Where pipe installation is not an option? It is still possible to use GemWater Plus!

If you want to take advantage of the amazing properties of GemWater Plus, the energizing and whirling of your tap water, but installing an activator into the pipe is not possible, we have a solution: you can simply install the GemWater Plus ½ inch model in the shower or under the sink using hoses. Please contact us for further information!

### Principles, advantages and applications of the GemWater Plus

- Installation at entry point of water-pipe into the property by a plumber (may be used in conjunction with an existing water filter).
- The alternative option of self mounting the GemWater ½ inch in the shower or under the sink

In this way, the vortex effect is created by means of whirling.

- Water activation as the water flows through the appliance by physical-energetic means and a vortex created by a high speed whirling effect.
- Fittings and valves in the water pipe system remain smooth running.
- Water heating for heating systems, tap and industrial water can be more effective and therefore cheaper, since activated water displays higher heat conductivity.
- Device may be used even in the vicinity of electrical appliances or areas of geopathic stress.

## Required size

- The pipe diameter determines the size of activator (½, 1, 1½ and 2 inch).
- There is no loss of water pressure or flow rate.

Design of the GemWater Plus

## Technical data

### GemWater Plus ½ inch

- Length: 26 cm
- Largest diameter: 5.0 cm
- Maximum working pressure: 15 bar
- Flow rate: 0.5 m<sup>3</sup>/h - 4 m<sup>3</sup>/h
- Weight: 2 kg
- Continual performance, for cold and hot water systems
- Suitable for apartments and single detached houses

### GemWater Plus 1 inch

- Length: 30 cm
- Largest diameter: 8 cm
- Maximum working pressure: 15 bar
- Flow rate: 10 m<sup>3</sup>/h - 17 m<sup>3</sup>/h
- Weight: 5 kg
- Continual performance, for cold and hot water systems

### GemWater Plus 1½ inch

- Length: 40 cm
- Largest diameter: 9 cm
- Maximum working pressure: 15 bar
- Flow rate: 30 m<sup>3</sup>/h - 40 m<sup>3</sup>/h
- Weight: 8 kg
- Continual performance, for cold and hot water systems
- Suitable for apartment blocks, hotels, industrial and agricultural premises

### GemWater Plus 2 inch

- Length: 40 cm
- Largest diameter: 9 cm
- Maximum working pressure: 15 bar
- Flow rate: 40 m<sup>3</sup>/h - 50 m<sup>3</sup>/h.
- Weight: 8 kg
- Continual performance, for cold and hot water systems
- Suitable for apartment blocks, hotels, industrial and agricultural environments and hospitals

Example of the installation into the pipe by a professional plumber.

## PRODUCTS WITH ENERGETIC WATER ACTIVATION

### GemWater Travel

*Vitalising water wherever you are*

The activator GemWater Travel supplies you with activated water when you travel. The GemWater Travel is placed near the tap – and the valuable information is transferred to the water instantly.

The orgone beamer inside GemWater travel is embedded in quartz sand. A phial with healing water is placed inside the cover lid.

A simple shape with premium inner life: the GemWater Travel plastic cover encloses and protects the orgone beamer and the quartz sand.

At the core of this activator is an orgone energy beamer working with specific wave lengths, frequencies and information, which effects targeted reactions in the subtle and material range of the activated water. The quartz sand used has been processed by means of the laser-enhancing technology developed by Dr. Todd Ovokaitys.

The GemWater Travel is supplemented by a glass phial with healing waters. The vibrations of these healing waters are also being transmitted to the activated water by means of the beamer. Just like tap water, bottled mineral water and drinks can also be activated.

#### Principles, advantages and applications of GemWater Travel

- Mobile use, no installation required
- Beneficial for those who travel or move between homes
- Length: 30 cm, diameter: 5 cm, weight: 1 kg
- Water activation from the outside by means of a physical and energetic process.
- Can be used effectively even close to electrical appliances or geopathic stress areas.
- For wells, cisterns and water tanks up to 30 m<sup>3</sup> of liquid per activator for the potential reduction of harmful bacteria and germs.

Pan before.

A few weeks later.

## GemWater Impulse

The GemWater Impulse is an attachment activator for home installation. It is attached to the water pipe by means of a bracket. If, for example in a rented property, installation of a built-in activator (GemWater Plus) directly into the pipe is not possible, the GemWater Impulse is highly suitable.

The core is once more an orgone energy beamer. This is built identically to the GemWater Travel device, but, in addition, is embedded in rock crystals which are surrounded by quartz sand. These precious and high energy materials are enclosed in a copper encasement built to harmonic measures. The quartz sand has been processed using the laser-enhancing technology developed by Dr. Todd Ovokaitys.

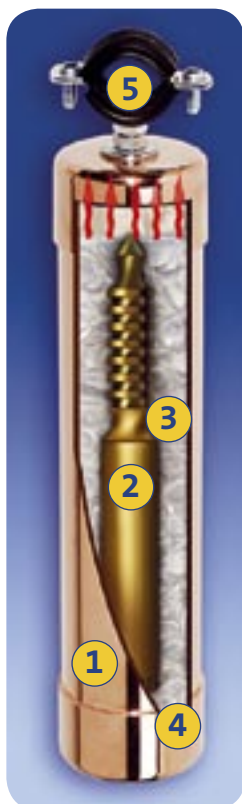

Installation by means of pipe bracket onto water pipe.

Water pipe with lime scale deposits before.

After a few weeks.

No water flows through the GemWater Impulse. The energy suppliers inside the activator transfer their power through the pipe to the water inside.

### Design of the GemWater Impulse

Height: 28.92 cm  
Diameter: 6.4 cm  
Weight: 3 kg

- 1 copper encasement with harmonic measurements
- 2 bio-energy beamer
- 3 rock crystals compacted with quartz sand
- 4 organic cotton
- 5 pipe bracket for ¾ inch water pipe

### Principles, advantages and applications of GemWater Impulse

- Fits to the outside of the pipe.
- Can be used for the water supply of apartments and detached properties with a pipe diameter of up to 1 inch.
- For industrial plants working with water as a coolant, solvent and means of transport.
- For agriculture and waste water treatment plants.
- Simple fitting by means of a bracket, therefore no installation costs.
- Water activation by means of a physical and energetic process.
- Can be used effectively even when near electrical appliances or geopathic stress areas.

## GemWater Boost

GemWater Boost can also easily be attached to the outside of a water pipe. It is also your ideal choice when a built-in activator (GemWater Plus) fitted directly into the pipe is not possible, for example in rented property. It differs from the GemWater Impulse through increased performance created by the addition of two turbo-loaders housing phials with healing water and pure oxygen. This further enhances the orgone energy beamer component of the activator. The energetically active components are embedded in rock crystals combined with quartz sand. The encasement box is made of stainless steel to harmonic measurements.

The quartz sand used in this activator has also been processed by the laser-enhancing technology developed by Dr. Todd Ovokaitys.

Fitted vertically onto the water pipe.

## Principles, advantages and applications of GemWater Boost

- Self-assembly: directly mounted onto the pipe by means of a clamp.
- Can be used for the water supply of large detached properties with a pipe diameter from 1 inch up to 1¼ inch.
- For industrial plants working with water as a coolant, solvent and means of transport.
- For agriculture and watering systems.
- For the water supply to swimming pools and baths
- Water activation from the outside by means of a physical and energetic process.
- Can be used effectively even when near electrical appliances or geopathic stress areas.

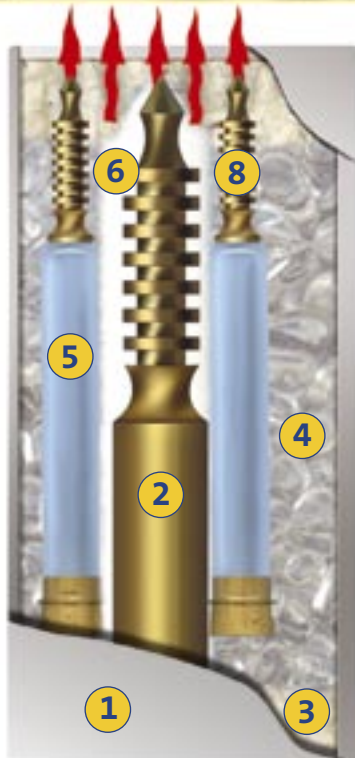

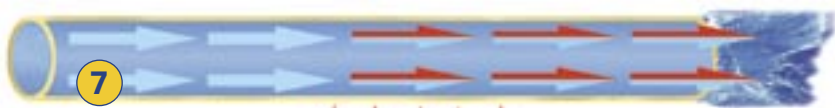

Heating coil before

After a few weeks

No water flows through the GemWater Boost. The energy suppliers inside the activator transfer their power through the pipe to the water inside it.

### Design of the GemWater Boost

Height: 28.92 cm  
 Width: 14.46 cm  
 Depth: 5.41 cm  
 Weight: 5.75 kg

- 1 stainless steel box with harmonic measurements
- 2 bio-energy beamer
- 3 organic cotton
- 4 rock crystals condensed with quartz sand
- 5 glass phials with healing water and pure oxygen
- 6 POM case
- 7 water pipe
- 8 turbo loader

**Not illustrated:**  
 clamp with wing screws
